

Jan. 18, 2018

Earlier you received communications from us related to your P320 and the Competition Action Package we performed on your firearm. As we've continued to develop and test improvements to our parts and processes, we've discovered that we can eliminate the need for you to ship your P320 back to Grayguns for in-house action work.

The outstanding SIG SAUER voluntary upgrade system has made it possible for Grayguns to design a new drop-in competition action fire control kit which you can have installed by your local qualified gunsmith or armorer, without the need for additional gunsmithing or shipping your pistol to Grayguns.

Our new Competition Kit generally yields comparable trigger pull enhancement qualities to the Competition Action Package you originally received. Both the straight and curved versions of the PELT2 and the Competition Kit will support the enhanced rough handling performance characteristics of the upgraded pistol for range only use. As before, our triggers are externally comparable in appearance from the factory part.

Your Grayguns-tuned P320 does not need to be returned to Grayguns, saving you a significant amount of time and hassle. *We strongly recommend you remove and retain for exchange the Grayguns trigger from your P320, and send the pistol in for the SIG Sauer® [Voluntary Upgrade Program](#). [Click here](#) to view the video on how to remove your trigger.*

At your convenience after you have removed the trigger from your P320, complete our online [Action Work Exchange Form](#). Note that you will need your P320's serial number handy so that we can match it up against our shop records.

Within 10 business days, you will receive an email including a USPS shipping label. Use that label to send your trigger back to Grayguns.

After Grayguns receives your trigger, we will send you a new P320 Competition Kit, which will include a trigger matching the trigger shape you returned to us. Competition Kits will also include a competition sear, sear springs and competition trigger bar spring. You'll also receive a coupon valued at \$50 towards a Grayguns online order.

As a reminder, PELT2 triggers and Competition Kits are specifically intended for installation by qualified armorers or gunsmiths in SIG factory-upgraded P320s only.

Competition Kits will be shipping early February but you can start the exchange process now.

If you have any questions or concerns about the exchange program, please contact us. We want to ensure every customer is comfortable with the process. We're looking forward to getting your upgrades to you, with less waiting than shipping your gun back and forth to us!

Thank you for your patience and faith in Grayguns.

Regards,
