

Jan. 18, 2018

Earlier you received communications from us related to your P320 and the straight or curved version of our Practical Enhanced Leverage Trigger (PELT) you purchased from Grayguns.

We are now launching our exchange program so that you can exchange your original PELT for our newly updated PELT2. Please continue reading to find out how the program will work.

As mentioned before, we recommend you *remove the Grayguns trigger from your P320, and send the pistol in for the SIG Sauer® [Voluntary Upgrade Program](#). [Click here](#)* to view the video on how to remove your trigger.

At your convenience after you have removed the PELT from your P320, complete our online [Trigger Exchange Form](#).

Within 10 business days, you will receive an email including a USPS shipping label. Use that label to send your PELT back to Grayguns.

After Grayguns receives your PELT, we will send you a replacement PELT2, which will include a trigger matching the trigger shape you return to us. You'll also receive a coupon valued at \$20 towards a Grayguns online order.

Our new PELT2 provides comparable trigger pull enhancement, pull weight reduction, and fit and feel to our original PELT, and can be installed by any qualified armorer or gunsmith in SIG factory-upgraded P320s. Both the straight and curved versions will support the enhanced rough handling performance characteristics of the upgraded pistol. As before, our triggers are externally comparable in appearance to the factory part.

PELT2 triggers will be shipping week of Jan 22. Curved PELT2s are on their way but you can start the exchange process now.

If you have any questions or concerns about the exchange program, please contact us. We want to ensure every customer is comfortable with the process.

We're looking forward to getting your new triggers to you!

Thank you for your patience and faith in Grayguns.

Regards,
